

TeamBoard IR

The Worlds Largest Interactive Touchscreen

TeamBoard IR is the world's largest touchscreen, ready to display your 16:9 presentation without cropping or distortion. Finger touch accuracy and TeamBoard reliability combines with state of the art infrared technology and award winning EVS™ dry-erase and projection surface. TeamBoard IR creates a lasting impression for your lecture theatre or conference room.

TMIR9856EM

98" w x 56" h, 110" diagonal

TeamBoard IR, EganMetallic IR frame.

- A strong professional design statement in any meeting room or lecture theatre.
- 110" diagonal in size, the TeamBoard IR is the largest interactive whiteboard in the market.
- A presentation solution with the power of interactivity—made easy.

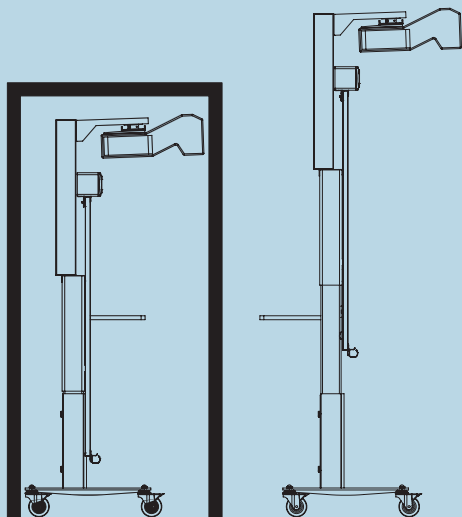

TeamBoard UST Mobile Stand

Mobile Interactive Powerhouse

A complete interactive whiteboard solution, the TeamBoard UST Mobile Stand supports all your presentation hardware: A TeamBoard ultra-short throw projector mount, audio speaker and swivel laptop mounts, and more.

The TeamBoard UST Mobile Stand can be moved room-to-room in moments. The motorized height adjustment maintains projector calibration so you are ready for your next presentation faster. In it's lowest position the Mobile UST Stand is at a comfortable height for wheelchair use and will roll through doorways with the projector in place.

- Ultra-short throw data projector provides very bright images with no shadow creation!
- Rolls room to room without having to re-calibrate or set up.
- Excellent for:
 - Tradeshows
 - Job site training
 - Multiple classrooms
- Features "lock solid" casters— locking both caster pivot and wheel rotation actions for presentation stability.
- Height adjustable: 61½–81½" h

In lowered position UST Mobile will fit through a 36" doorway.
