Fixed Wallmount

TeamBoard is adjustable

TeamBoard Total Wallmount brings the interactivity of TeamBoard RT to multiple heights at the push of a button. TeamBoard Total Wallmount's innovative design allows you to integrate your TeamBoard and projector into one wall mount unit that offers a full 18" of vertical height adjustment, maintaining the projector-to-board calibration. No tools or technical expertise required to adjust the height – just press a button to raise or lower your TeamBoard – Easy does it!

TeamBoard Total Wallmount works well with both TeamBoard RT 77" 4:3 and the widescreen TeamBoard RT 85" 16:10 models.

Improved accessibility

TeamBoard Total Wallmount offers the presenter a full 18" (45cm) of height adjustment through just the touch of a finger. It adjusts quickly and smoothly to any height within its range. With finger touch operation and a low and uniform noise level, the presenter can adjust the height without disrupting the flow of the interactive presentation, so you can adjust on-the-fly. This improves full accessibility to TeamBoard for presenters of all stature, and it's A.D.A. compliant too.

Improved projector performance and integration

When securely installed on the wall, TeamBoard Total Wallmount™ integrates the projector with TeamBoard for simple installation and use. As you adjust the height of your TeamBoard the projector stays calibrated at all times. At the lowest position, projector settings may be easily reached. Sanyo XL46 Short Throw projector installs in a keystone-neutral position for optimum focus clarity and the presenter's presence in the beam is minimised. No more hassle with overhead ceiling mounts and in-ceiling cables. No more hassle with loose desktop projectors and cables running across the floor. Everything is integrated and adjustable.

¹ Projectors not included. TeamBoard Total Wallmount is designed for use with Sanyo UST projectors XL50 and XL51, or with Sanyo ST projector XL46 only. Please specify when ordering; ST projectors do not work with the UST arm, and the UST projector does not work well with the ST arm. Other ST mounts may be available, please inquire.

Features

Benefits

- | | |
|----------------------------|--|
| ✓ Height Adjustable | <ul style="list-style-type: none">> 18" (45cm) of vertical travel to accommodate presenters of all heights> Mounting plate can be installed at a height of your choice, so the upper and lower limits of the 18" range are at the heights you choose> At lower heights your TeamBoard is more accessible for those in early grades, or in wheelchairs. ADA compliant |
| ✓ Push-button Control | <ul style="list-style-type: none">> Finger-touch electronic height adjustment> It's infinitely adjustable – choose any height within the range without compromise |
| ✓ Quiet Operation | <ul style="list-style-type: none">> Low and uniform noise level means zero-interruption height adjustment> Easy to maintain normal speaking voice while adjusting height |
| ✓ Integrated Installation | <ul style="list-style-type: none">> Your TeamBoard and projector are integrated into Total Wallmount for one Easy does it installation, eliminating the need for projector installation and through-the-wall wiring |
| ✓ Integrated Projector Arm | <ul style="list-style-type: none">> Projector arm travels with the height adjustment of the interactive whiteboard, so it stays calibrated, without technical assistance> Ceiling projector location minimizes presenter's blocking of the projector beam path, reducing shadows and increasing presenter comfort> Improves accessibility to the projector—bringing it within reach when it's necessary to engage projector buttons and adjustments |
| ✓ Modular Projector Arm | <ul style="list-style-type: none">> The projector arm can be changed for a different projector mount (as available and sold separately) |

easyTM
does it.

- Easy to use
- Finger-touch height adjustment
- 'Whisper' quiet operation

Design Intent

TeamBoard Total Wallmount integrates the installation of your TeamBoard and projector (sold separately or bundled) for a clean installation and height adjustment that is simple to operate—a simple touch of the finger and choose the height you want, everything stays calibrated—Easy does it!
